THRIVING ON PASSION FOR PRECISION & PERFORMANCE MACHINES

Rhishikesh Chopade,  
 Director

The marketplace for construction equipment, globally, is anticipated to increase at a CAGR of 6.6 percent from 2021 to 2028, growing from \$141.99 billion to \$222.14 billion during the forecast period, as per Construction Equipment Market Analysis Research Report, 2021-2028. The Indian construction equipment market is projected to expand considerably at a CAGR of 8.75 percent during the forecast timeframe (2022-2028). The Indian administration also declared in 2020 that it would expend upwards of \$212.8 billion by 2030 to scale out the nation's road system. The requirement for heavy equipment haulers in the earthmoving subsector is anticipated to witness significant growth due to factors such as growing governmental investment in the development of expressways, railways, metro, airport, and renewable energy sources in 2021. A leading player addressing these needs is Maruti Hydraulics. One of the top Manufacturers of AAC Block Plants in India, Maruti Hydraulics was founded in 1991. An ISO 9001:2015 certified company, the firm is leading the charge with its groundbreaking services and

products, contributing heavily to India's development initiatives.

## A Gamut of Excellent Services & Products

Maruti Hydraulics is a leading Indian organization that has supplied four sizeable AAC plants abroad. Their technique has been increasingly tested, and the excellence of the machines has been acknowledged widely. The firm has also received extensive positive feedback about its complete support network. The company is 100 percent committed to increasing client satisfaction. "Having the passion for precision and performance machines, we are today a trusted and leading manufacturer of AAC Block plants, CLC Block Plants, Fly Ash Brick machines, Concrete Block machines, Paver block machines, Dry Mortar Plants and other construction industry machines reframe. Enquiring into and understanding the needs of our customers, we also provide turnkey solutions", shares Rhishikesh Chopade, Director. "We have introduced ourselves in civil construction of the AAC projects which gives our customers hassle-free and timely completion of projects. Additionally, we have exported to nations in South East Asia, the Middle East, and Africa", adds Rhishikesh.

In addition to the leading services that the firm offers, Maruti Hydraulics is the only producer in the nation with the capability to manufacture all of the equipment needed to establish a complete Project which also includes the boiler. These factors, in addition to the experienced team that the organization houses are the key differentiators which make Maruti stand out from its competitors. "We have an experienced team of Engineers across services including Marketing, Sales, Design and Development, Planning, Procurement

and Material, Production and After Sales, all these departments have one common agenda, never to repeat any of the mistakes and Improving with each passing project and experience. All of them know that Customer satisfaction is their prime objective", further shares Rhishikesh. "We seamlessly make use of the available technology for managing and maintaining strong communication between departments, so the productivity and customer satisfaction increases", mentions Rhishikesh.

## Future Roadmap

The most active period of business expansion for Maruti Hydraulics in this industry will be the next 10 to 15 years. They consistently ensure that they and their production capabilities are improved as they are one of the sector leaders. To make a leap to capitalize on this expected growth phase, Maruti Hydraulics anticipates working together with the appropriate partners. Furthermore, they are working to launch a customer support app that will provide them access to far more effective service and prompt responses. The company is pursuing a variety of options, and they are confident that doing so would propel them to the top of their sector. Maruti Hydraulics will also be introducing equipments for manufacturing of Sandwich Panels, Polystyrene Concrete Panels, Reinforced AAC Panels. [li](#)
